

6 January 2010

Dear Students:

Our management vision is based on new ideas and actions especially inspired by innovative facts. Institutionally, we are heading through the pathway of our honorable leader Mustafa Kemal ATATÜRK's new revolutionist movement. We can achieve the goal of revolutionist movement, only by supporting the new and creative projects held by young students of young republic.

When this project was presented by Istanbul Technical University students, I had no doubt that the project would prove a lot of benefits for human communication, improving the tolerance between civilizations and of course the economic basis of students. In our global world, these issues underlined are getting more and more important.

As a former graduate of Istanbul Technical University, I am proud of being a part of an ITU organization as Vice- Mayor of Sarıyer District where Istanbul Technical University is located.

Hope to see you in our awesome Istanbul.

Sincerely,

Vice-Mayor of Sarıyer

Şinasi YALÇIN
